

Queensland Storm Season Hits Early – Fallon Solutions Urges Homeowners to Prepare Before Christmas - Brisbane, QLD – 5th December 2025

With severe thunderstorms already sweeping across South East Queensland, Fallon Solutions is urging homeowners to get storm ready as summer weather intensifies. Recent storms have brought damaging winds, lightning strikes, hail, and sudden downpours, triggering everything from power surges and electrical faults to overflowing gutters, cracked solar panels, and flooding. And with the Bureau of Meteorology warning that more severe cells are expected throughout December, now is the time to act.

“Storm season has come in hard and fast this year,” said Mark Denning, General Manager – Fallon Solutions. “We’re seeing a spike in emergency callouts following thunderstorms. Power surges knocking out appliances, stormwater drains overflowing, lightning damaged switchboards, and hail impacting solar panels. These issues can escalate quickly if they’re not checked straight away. Now is the time to act, not after the next storm hits.”

Fallon Solutions’ team of licensed electricians, plumbers, drainage specialists, and solar technicians are helping Queenslanders recover from recent storms and prepare for what’s ahead. Services

include:

- Clearing and inspecting stormwater drains to prevent flooding
- Checking switchboards, surge protection, and safety switches after lightning activity
- Inspecting solar panels and inverters for hail, water, or wiring damage
- Ensuring home battery and solar systems are safely operating after severe weather

“Simple preventative checks now can save thousands in storm damage repairs later,” Mr Denning added. “If you’ve noticed pooling water, flickering lights, burnt smells near appliances, or hail damage after the last storm, don’t wait get it looked at before Christmas. Our trades are filling up fast.”

Homeowners across Brisbane, Ipswich, Logan, Moreton Bay, and the Gold Coast are encouraged to book early to secure pre-Christmas appointments.
