

Fallon Solutions Launches New Community Sponsorship Program to Support Local Sporting Clubs and Reward Referrals **Brisbane, QLD – 28 October 2025**

Fallon Solutions, one of Queensland's largest home services companies, has launched a new Community Sponsorship and Referral Program to strengthen ties with local sporting clubs while helping members access affordable solar and home energy solutions. The initiative rewards community clubs across South East Queensland with \$150 for every completed solar or battery installation referral, with the potential to earn up to \$2,500 in annual sponsorship funding.

Empowering Local Clubs Through Clean Energy

Under the new program, when a club member, friend, or family member installs a solar or battery system through Fallon Solutions, their nominated club receives a \$150 rebate. Clubs that reach eight successful referrals by 31 January 2026 will also receive a full 12 month sponsorship valued at up to \$2,500.

"We've always believed in giving back to the communities that support us," said Mark Denning, Managing Director of Fallon Solutions. "This program lets us help clubs raise much needed funds while promoting cleaner, smarter energy solutions that benefit Queensland families."

The initiative aligns with the recent Cheaper Home Batteries Program, which offers a 30% Federal Government rebate on battery installations, making it easier for households to adopt solar storage and for local clubs to share in the rewards.

Supporting Local Communities and Families

For Fallon Solutions, this program is more than sponsorship it's about partnership and empowerment. By encouraging club members to consider sustainable home upgrades, the company is helping both families and community organisations save money and achieve long term benefits.

“We’re proud to partner with Queensland’s grassroots sporting community,” said Nicole Waters, Group Marketing Manager at Fallon Solutions. “Families reduce their energy bills and carbon footprint, while their local club earns valuable funding support to keep players on the field. The program is open to clubs throughout Brisbane, Ipswich, Logan, Redlands, Moreton Bay, Gold Coast, and Sunshine Coast. ”

How the Program Works

1. Clubs register their interest and receive a unique referral code.
2. Members, friends, or family book a solar or battery installation using that code.
3. Fallon Solutions completes the installation and provides the club with a \$150 rebate.
4. Once the club reaches eight successful installations, Fallon commits to a 12 month sponsorship worth up to \$2,500.

Participating clubs also receive promotional resources and social media support from Fallon’s marketing team to help drive engagement and awareness.
