

Start the Year Right: Fallon Solutions Urges Queenslanders to Prioritise Home Safety and Self-Care in 2026

Brisbane, QLD – 6th January 2026

With the new year underway, Fallon Solutions is reminding homeowners that caring for their home is an important part of caring for their wellbeing. After a busy festive season, January provides the perfect moment to reset, refresh, and address small issues before they become major disruptions. From overdue maintenance to electrical and plumbing concerns that often surface during the summer period, early action helps ensure a safer, more comfortable year ahead.

“Homeowners tend to focus on resolutions like fitness, organisation, or personal goals, but one of the most overlooked forms of self-care is maintaining a safe, comfortable, and reliable home environment,” said Mark Denning, General Manager – Fallon Solutions. “A few simple checks in January can dramatically reduce stress and create peace of mind for the rest of the year.”

Fallon Solutions recommends beginning with core safety essentials including electrical safety switch testing, smoke alarm compliance checks, drain maintenance, and air conditioning servicing to improve indoor air quality during peak heat. The company also highlights the importance of solar health checks and battery readiness, particularly as more Queenslanders invest in energy-efficient technology.

With Queensland's storm season still active through summer, ensuring gutters, downpipes, outdoor drains, and switchboards are ready for severe weather is equally critical. "Your home works hard for you, especially over Christmas and through the heat of January," Denning said. "Taking a

proactive approach now helps avoid expensive emergencies later, improves energy efficiency, and keeps your family safe and comfortable."

To support homeowners in staying ahead of maintenance needs, Fallon Solutions is encouraging Queenslanders to invest in its **Home Protection Plans**. These membership programs offer year-round value through priority booking, a 15 percent service discount, complimentary annual plumbing and electrical inspections, VIP hotline access, and exclusive member-only offers. By spreading maintenance throughout the year, the plans help households manage costs, prevent avoidable breakdowns, and maintain compliance across key systems.

"Thousands of Soeth East Queensland families already enjoy the peace of mind that comes with our Home Protection Plans," Denning added. "Starting the year with a structured maintenance approach ensures safer living conditions and reduces the likelihood of unexpected repairs."

Fallon Solutions offers one-call convenience for all major home services, backed by licensed tradespeople, same-day availability, a limited lifetime labour warranty, and more than 5,000 five-star customer reviews. The company encourages homeowners to book annual checks early, with January and February traditionally among the busiest maintenance months.
